CITY CLERK

Eddie

Last night I believe was the first time since I have been on the council that we had to state that there was a "hardship" when we moved to approve a zoning request. Can you explain why this was the first time we had to do so this year? If it is council rules where does that state it? If it is state statute the same citation please? Looking at some of the other council members during the vote, I seen confusion all around last night? Please clarify?

Thanks
Karrum
